TECHNICAL SKILLS

Languages: JavaScript/TypeScript, Python, HTML/CSS.

Frameworks: React, NextJS, NodeJS, FastAPI, Flask, Bootstrap.

Libraries: TailwindCSS, Shadcn UI, MUI

AI Agent Workflow : n8n, Openai Agent SDK

PROFESSIONAL EXPERIENCE

FRONTEND DEVELOPER (Self-Learning) | Remote

Sep 2024 – Present

Completed over 1 year of practical frontend development through self-learning and project-based practice, building modern, responsive web applications.

- Developed 2–3 web projects using React, Next.js, TailwindCSS, Sanity CMS, and ShadcnUI.
- Designed responsive user interfaces with reusable components and clean layouts.
- Integrated Sanity CMS for dynamic content management and optimized performance in Next.js applications.
- Strengthened problem-solving and coding practices by delivering functional, user-focused solutions.

WEB DEVELOPER INTERN | The Pixxel House Institute | Hyderabad, Sindh

Apr 2024 – June 2024

Selected for internship after completing a 1-year development training course, recognized for strong passion in coding and web technologies.

- Learned industry-level workflows and best practices in front-end development.
- Gained hands-on experience with **HTML, CSS, JavaScript, Bootstrap, and jQuery**.
- Designed and developed the company's website landing page, ensuring responsive layout and user-friendly design.

PROJECTS

[INFLUENCER MARKETING AGENCY WEBSITE](#) | Freelance Project | April 2025

Developed a fully functional website for an influencer marketing agency, focusing on responsive design and client lead capture.

- Built the frontend using **Next.js, TailwindCSS, and ShadcnUI** for a modern and responsive interface.
- Integrated **Sanity CMS** for managing dynamic website content.
- Implemented **form validation** using React Hook Form.
- Configured form submissions to automatically send client information directly to **Gmail** for streamlined communication.

[COMFORTY](#) | HACKATHON | Dec 2024 – Feb 2025

Developed a fully functional e-commerce application during a hackathon with end-to-end features including payment integration and dynamic content management.

- Built responsive UI using **Next.js, TailwindCSS, and ShadcnUI**.
- Implemented **form validation** with React Hook Form for secure user input handling.
- Integrated **Stripe** for payment processing.
- Configured **Sanity (Headless CMS)** to manage and store all product, order, and customer data.
- Ensured seamless data flow between frontend and backend through CMS-driven architecture.
